THE TRUTH ABOUT SALTILLOS:

Salttilos are handmade tiles from Saltillo, Coahuila, Mexico. They are rustic and have a lot of personality. We would like you to know that Salttilos have the following characteristics:

- ♦ Salttilos have sandy backs. Caused by dumping the wet tile slurry into the mold on the ground to sun dry before baking.
- ♦ Salttilos can have chipped edges.
- ♦ Salttilos can have lime pops (little craters).
- ♦ Salttilos are not the same size.
- ♦ Salttilos are not the same thickness.
- ♦ Salttilos are not all flat.
- ♦ Salttilos are not all square.
- ♦ Salttilos can have occasional cracks on the surface.
- ♦ Salttilos can ,if you are lucky, have animal prints.
- ♦ Salttilos are not the same color. They can vary in shading within the same tile, also.
- ♦ Salttilos are prone to alkali in the clay, to minimize problems they must be properly sealed and kept sealed.
